

Our workplace supports TRAFIKKALENDERN

Greater commitment to the safety of children in traffic feels more urgent than ever before. Road traffic is on the increase and more and more parents are choosing to drive their children to school because the routes to school are not considered to be safe enough.

By participating in Trafikkalendern, our workplace is helping to improve the safety of traffic in proximity to children. The best way of doing this is to show greater

consideration for children in traffic.

All children in year F-6 are given Trafikkalendern in connection with starting school. Various monthly activities on the subject of traffic remind the children to work with traffic issues throughout the school year. Trafikkalendern involves children, teachers, parents and the local community. This leads to the necessary cooperation to create better conditions for children in traffic.
